Course: CS 161 Section 01

Date: 04/22/2024

Progress:

- Professor encountered an issue with the build step, so trying to troubleshoot and fix that.
  - Currently my top priority, so sidelining other work to ensure the project can be built.
- Working on user auth and game logic but have not pushed it yet.
  - Want to ensure the base project can be built properly before adding more code on top in the repo.
  - Game logic/functionality looking more sound, but still a work in progress.

Milestone Progress:

- Tackling Milestone 2, 3, and 4 simultaneously
  - UI changing based on implementation for 2 and 3 so easier to work on it at the same time
- Milestone 1 is complete.
