Gargi Tawde
Unlock the Vault
Course: CS 161 Section 01
Date: 04/28/2024

Progress:
- Newly Completed:
    - show/hide password
    - Password hashing
    - User-provided form data on signup and login pages get saved
    - User notified if password inputted on signup doesn't meet requirements.
    - User notified if both passwords on the signup page don't match.
- In Progress:
    - Fixing backend build
        - Still causing problems but almost complete. Hope to push the fixed version to github this upcoming week.
    - User auth (backend build issues preventing proper testing)
    - Implementing professor's suggestion to add levels, which would change the number range based on what a user selects. (e.g. Level 1 would mean users are looking for values between 1 and 10)

Milestone Progress:
- Tackling Milestone 2, 5, 6 simultaneously
    - Testing as I go while I continue fixing the backend build issues.
- Milestone 1 is complete. (GitHub setup, Flask project blueprint, finalize website design)
- Milestone 3 is complete. (Game functionality)
- Milestone 4 is complete. (Work on/Refine UI)
